Contributors

Coast to Coast

The Coast to Coast Foundation inspires knowledge and innovation exchange between US and European partners, NGO's, academia and industry working on equitable, smart and clean transportation solutions. In addition, the Foundation supports young talent to learn and innovate through trans-Atlantic exchange and research in this exciting space.

Mobycon

Mobycon is a Dutch-American consultancy specializing in developing and implementing innovative and sustainable mobility solutions nationally and internationally. With more than 35 years of experience Mobycon is an expert in translating Dutch best practice to a North-American context.

Dutch Cycling Embassy

The Dutch Cycling Embassy works with cities around the world to share knowledge and expertise from the world's number one cycling country. We help to translate best practice from the Netherlands in order to facilitate cycling as the most modern, efficient and sustainable method of transport.

TNL

TNL 's advanced mobility solutions and traffic flow management systems are unequalled in the world. We know how to bring measurable results to a city, improving the safety and experience of people on the streets and in public transit vehicles.

Goudappel

Goudappel is the leading firm in Mobility-planning in The Netherlands. With 60 years of experience and over 300 employees Goudappel provides her clients with data-driven mobility-information, research and consultancy in the fields of mobility-policy, urban design, mobility-management, public transport, cycling and parking.

TNO

TNO is the leading Dutch Organization for Applied Research. We have developed the Urban Strategy™ predictive Digital City Twin platform. This extremely powerful instrument enables cities to run complex policy scenarios for Mobility, Air Quality, Noise, Energy and Equity in time, allowing interactive engagement of all stakeholders, leading to better decisions.
